

Study Tour in Slovenia

8th, 9th and 10th May 2019

Slovenia is well known for being a green country as it has been awarded the Greenest destination price in 2016. Obviously waste management plays an important role in this, since the country met the EU 2020 recycling targets 4 years ago although only joining the European Union in 2004.

In spite of lately implementing a proper waste separate collection system, it quickly exceeded the average EU results by choosing to focus on recycling rather than disposal of waste.

Progression of Municipal Solid Waste recycling rate in EU28 and Slovenia (2013-2018)

As a perfect illustration of this system, the capital Ljubljana offers results going beyond the national ones. The city, along with its public company Snaga, has committed to become a Zero Waste capital and provides an efficient waste management system to nearly 400,000

inhabitants. As Zero Waste goes beyond mere waste management, the city enhanced its waste prevention activities and set the ambitious target of halving its residual waste by 2025.

To better understand how Slovenia achieved these successes, Zero Waste Europe invites you to a Study Tour in Slovenia and its capital. Developed with the objective of disseminating good practices around Europe, this study tour is taking place on the 8th, 9th and 10th of May. Visits and presentations will be in English.

PROGRAMME

Places and visits orders are subject to change due to last-minute arrangements.

Day 1 - Wednesday, May 8th - Ljubljana

Ljubljana, along with 10 suburban municipalities, has the highest separate collection rate among capital cities of the European Union. The waste management company behind it is [Snaga](#).

Ljubljana becoming the first Zero Waste city in Europe.

The first day of the Zero Waste Study Tour is dedicated to discover the waste management system in Ljubljana implemented by Snaga.

This will include:

- Presentation of how the waste system works, what are the results and the objectives

- Reuse centre and various packaging free shops
- Visit of the Regional Waste management center
- Presentation of the different campaigns led by the city on circular economy, reuse or food waste prevention

To learn about it in detail before the Study Tour, you can download our [Case Study on Ljubljana!](#)

Night in Ljubljana.

Day 2 - Thursday, May 9th - Bled and Vrhnika

Morning:

The city of Vrhnika:

In a country that until 2001 had no national targets for waste separate collection, the small municipality of Vrhnika showed how a community can quickly go from landfilling everything to recycling most of its municipal solid waste.

To learn about it in detail before the Study Tour, you can download our [Case Study on Vrhnika!](#)

Afternoon:

Bled and its Zero Waste Hotel:

- Lunch and visit at the first Slovenian Zero Waste Hotel, [Hotel Ribno](#)

After reaching more than 92% separate collection, Hotel Ribno officially became the first Slovenian Zero Waste Hotel in 2018.

- Visit of the touristic city of Bled

Well known for its lake with a castle in the middle, the city of Bled - overcrowded by tourists producing 70% of the annual waste - committed to Zero Waste by implementing waste management and waste prevention measures.

Night in Ljubljana.

Day 3 - Friday, May 10th - Zero Waste workshop in Ljubljana

Morning (9:00-13:00):

Zero Waste workshop training:

This half a day training is dedicated to civil servants working at the local level, waste management professionals, activists, members of NGOs and anybody else wishing to see how a Zero Waste strategy can be applied in their city. It will include training on:

- Implementing ZW schemes: operational and organisational approaches, execution, achievements,
- The economic and environmental benefits of Zero Waste programmes
- Economics and Mathematics of (Zero) Waste Management: facts & figures to reverse mistaken opinions
